SUMMARY

Full Stack Developer with experience in Spring Boot, Angular, and MySQL for application development. Proficient in REST API creation, database management, and implementing Spring Security. Currently a Emerald Business Ventures Pvt. Ltd., with hands-on experience in real-world projects and a focus on delivering efficient solutions.

WORK EXPERIENCE

Software Developer, Emerald Business Ventures Pvt. Ltd

May 2025 - Present

- Developed and deployed scalable, multi-tenant PaaS applications using Spring Boot, Angular, and MySQL, with secure RESTful APIs and robust authentication via Spring Security.
- Integrated external APIs and optimized SQL queries for high-performance data operations, while implementing responsive UI components and seamless API communication in Angular.
- Led full-stack development and cloud deployment of modular applications with CI/CD pipelines, supporting customizable workflows and role-based access control across clients.

Software Engineer, Go 2 Market India Pvt. Ltd

August 2023 - April 2025

- Implemented Spring Security, consumed external APIs, and deployed projects on servers.
- Designed and optimized SQL queries for data interaction in MySQL databases.
- Developed REST APIs with Spring Boot , and integrated these APIs in Angular , created view page using HTML/CSS/JavaScript .
- Developed multiple projects using Spring Boot, Angular, and MySQL database.

Java Intern, Pratikshat Solution LLP

Jan 2023 - July 2023

- Actively learning Angular and Spring Boot to enhance skills in full-stack develop.
- Developed multiple dummy projects to practice and implement theoretical knowledge in practical scenarios and Contributed to live projects, gaining hands-on experience in real-world application development.
- Developing the ability to handle various types of code complexity effectively, ensuring efficient solutions.

Insttutional Training as Full Stack Java Developer

July 2022 - Dec 2022

TECHNICAL SKILLS

Backend : Java, Spring Boot (REST Apis, Security, Spring AI), Microservices, Hibernate/JPA, JDBC
Frontend : Angular (RxJS, NgRx), TypeScript, JavaScript, HTML/CSS, Bootstrap – Scalable & designing
Database : MySQL, PostgreSQL – advanced SQL, joins, indexing, stored procedures
API & Integration : RESTful APIs, third-party API integration (SMS, Email, WhatsApp), Postman, Swagger
Tools & DevOps : Git, GitHub/GitLab, Maven, Docker (basic), AWS EC2, CI/CD (basic Jenkins)
Other : Agile, JIRA, MVC, microservices architecture, debugging, clean code practices

EDUCATION

Bachelor of Technology in Electrical & Electronic Engineering

IKG Punjab Technical University Jalandhar (Punjab)

Aug 2018 - May 2022

Intermediate in science

Mv College Buxar (Bihar)

April 2016 - May 2018

PROJECT

Mandi Digital Payment Portal

July 2026 - Present

Angular-based admin platform for mandi merchant onboarding, approval workflows, and payment operations. Built separate Admin and Merchant dashboards with KPIs, charts, filters, and real-time platform insights. Developed modules for shops, staff, bank accounts, wallets, transactions, and master data with role-based access control. Integrated REST APIs (merchant-core & payment/wallet services) using JWT auth, error handling, and responsive UI.

NBFC Web Portal

March 2026 - July 2026

Developed an NBFC Portal using Angular 18 on the frontend and Spring Boot REST APIs on the backend to manage the complete loan lifecycle. The application supports loan origination, KYC/verification, underwriting, sanction, disbursement, active loan servicing, EMI collection, and loan closure. It also includes an admin dashboard, operational reports, product/charge configuration, and role-based access control.

Fleet Card Management System

Jan 2026 - March 2026

Developed a comprehensive fleet card solution to manage fuel and expense transactions for vehicles. The system includes features like card issuance, transaction tracking, spending controls, real-time monitoring, and reporting dashboards. Integrated secure APIs for payment processing and enabled role-based access for admins and users, ensuring efficient expense management and operational transparency.

Enterprise HRMS Platform (PaaS Model)

June 2025 - jan 2026

Developed a full-stack HRMS using Spring Boot, Angular, and MySQL, featuring Attendance, Leave, Payroll, Employee, Expense, Travel, and Broadcast modules. Implemented JWT/Spring Security, role-based access, REST APIs, email/WhatsApp integrations, and deployed the system on AWS EC2 with optimized SQL queries.

LMS Platform (Lead Management System)

June 2024 - May 2025

A system designed to manage leads efficiently by integrating calling and social media channels. It tracks and monitors follow-ups until the sale is closed. The project supports bulk lead uploads and processes leads from multiple channels. Daily activities and lead progress are monitored to ensure timely action and conversion.

CCC (Cloud Calling Center)

Aug 2023 - May 2024

A cloud-based solution offering inbound and outbound call management with preview, progressive, and auto-dialing options. Integrates with WhatsApp, email, and SMS for multi-channel communication. Features a user-friendly CRM, supports bulk campaign uploads, and handles multi-process management for different users, ensuring scalability and efficiency across operations.
